1. (Currently amended) A display device, comprising:
~~an~~ a reflective image-generating arrangement configured to reproduce images, the images being visible to a viewer when the device is operated in either ~~or both~~ of two modes, including a first mode wherein the device produces a real image of the image-generating arrangement, the real image being suitable for direct viewing by the viewer, and a second mode wherein the device produces a virtual image of the image-generating arrangement, wherein the light that forms the virtual image proceeds from the image-generating arrangement to the viewer without being scattered by a diffusive screen without producing a real image of the image-generating arrangement.
 2. (Withdrawn) A display device as defined in claim 1, wherein the image-generating arrangement is a microdisplay.
 3. (Withdrawn) A display device as defined in claim 2, wherein the microdisplay is a liquid crystal microdisplay.
 4. (Withdrawn) A display device as defined in claim 3, wherein the liquid crystal microdisplay is a ferroelectric liquid crystal microdisplay.
 5. (Withdrawn) A display device as defined in claim 3, wherein the liquid crystal microdisplay is a nematic liquid crystal microdisplay.
 6. (Withdrawn) A display device as defined in claim 2, wherein the microdisplay is a digital micromirror device.
 7. (Withdrawn) A display device as defined in claim 2, wherein the microdisplay is a TFT device.
 8. (Withdrawn) A display device as defined in claim 2, wherein the microdisplay is
